###Resources: When adding files to the Resources\_pdf folder keep the naming of the files exactly the same in both the english (EN folder tree) and the french (FR folder tree). This is only to prevent any confusion or any overcomplicating the pathing. FOR EXAMPLE: in the EN resources.html the link to a pdf file would be:  
Resources\_pdf/windows/In-Classroom/EN/Primary/Python/KCJ\_Python\_Lesson5.pdf

in the FR resources.html the link would be:  
Resources\_pdf/windows/In-Classroom/FR/Primary/Python/KCJ\_Python\_Lesson5.pdf

as

you can see only the FR was switched.  
ALSO, if a power point is being added (.pptx the .txt/.pdf of power points), add the the "resources\_link" class to the a tag

EXAMPLE:

```
<a class="resources_link"
href="example.pptx" target="_blank">
```
